3. Code SQL générant les tables
4. Base de données chargée

# 1. Dictionnaire de données

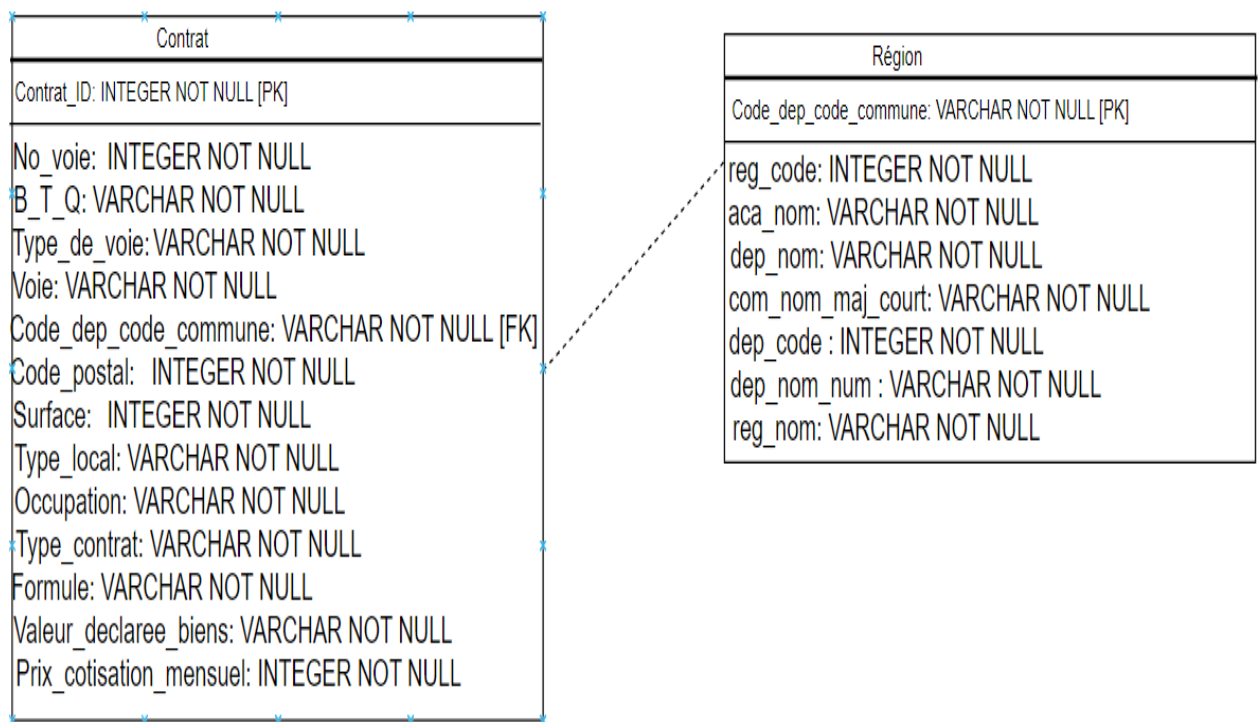

Les types de données principalement utilisés sont :

- VARCHAR
- INT
- CHAR

|             | Nom des colonnes        | Type de données | Taille | Clé            | Description                                                                          |
|-------------|-------------------------|-----------------|--------|----------------|--------------------------------------------------------------------------------------|
| CONTRAT.CSV | Contrat_ID              | INT             | 10     | Clé primaire   | Id unique pour les contrats                                                          |
|             | No_voie                 | INT             | 10     |                | Numéro dans la voie pour l'adresse du logement assuré                                |
|             | B_T_Q                   | CHAR            | 1      |                | Indicateur éventuel de répétition pour l'adresse du logement assuré sur un caractère |
|             | Type_de_voie            | VARCHAR         | 255    |                | Type de voie pour l'adresse du logement assuré: rue, av (Avenue), rte (Route), ...   |
|             | Voie                    | VARCHAR         | 255    |                | Libellé de la voie pour l'adresse du logement assuré                                 |
|             | Code_dep_code_commune   | INT             | 10     | Clé secondaire | Concaténation du code département et code commune pour avoir une clé unique          |
|             | Code_postal             | INT             | 10     |                | Code postal pour l'adresse du logement assuré                                        |
|             | Surface                 | INT             | 10     |                | Surface habitable du logement assuré                                                 |
|             | Type_local              | VARCHAR         | 255    |                | Type de logements : appartement ou maison                                            |
|             | Occupation              | VARCHAR         | 255    |                | Situation de l'occupant                                                              |
|             | Type_contrat            | VARCHAR         | 255    |                | Type de contrat pour les différents logements                                        |
|             | Formule                 | VARCHAR         | 255    |                | Formule adapté pour le logement                                                      |
|             | Valeur_declaree_biens   | VARCHAR         | 255    |                | Indique la valeur des biens déclarées                                                |
| REGION.CSV  | Prix_cotisation_mensuel | INT             | 10     |                | Montant à payer par mois pour chaque bien                                            |
|             | Code_dep_code_commune   | INT             | 10     | Clé primaire   | Concaténation du code département et code commune pour avoir une clé unique          |
|             | reg_code                | INT             | 10     |                | Code pour chaque région                                                              |
|             | aca_nom                 | VARCHAR         | 255    |                | académie à laquelle appartient une commune                                           |
|             | dep_nom                 | VARCHAR         | 255    |                | Nom des départements                                                                 |
|             | com_nom_maj_court       | VARCHAR         | 255    |                | Nom des communes en majuscule                                                        |
|             | dep_code                | VARCHAR         | 255    |                | Code de département                                                                  |
|             | dep_nom_num             | VARCHAR         | 255    |                | Nom et code des département                                                          |
|             | reg_nom                 | VARCHAR         | 255    |                | Nom des régions                                                                      |

## 2. Schéma relationnel

- La **clé primaire** dans la table **Contrat** : Contrat\_ID (Not Null)
- La **clé primaire** dans la table **Région** : Code\_dep\_code\_commune (Not Null)
- La **clé étrangère** qui réunit les deux tables : Code\_dep\_code\_commune (Not Null)

### 3. Code SQL générant les tables

#### 3.1 Pour la table Contrat

```
CREATE TABLE Contrat (  
    Contrat_ID INTEGER NOT NULL,  
    No_voie INTEGER NOT NULL,  
    B_T_Q VARCHAR NOT NULL,  
    Type_de_voie VARCHAR NOT NULL,  
    Voie VARCHAR NOT NULL,  
    Code_dep_code_commune VARCHAR NOT NULL,  
    Code_postal INTEGER NOT NULL,  
    Surface INTEGER NOT NULL,  
    Type_local VARCHAR NOT NULL,  
    Occupation VARCHAR NOT NULL,  
    Type_contrat VARCHAR NOT NULL,  
    Formule VARCHAR NOT NULL,  
    Valeur_declare_biens VARCHAR NOT NULL,  
    Prix_cotisation_mensuel INTEGER NOT NULL,  
    PRIMARY KEY (Contrat_ID),  
    FOREIGN KEY (Code_dep_code_commune) REFERENCES  
    Région(Code_dep_code_commune)  
);
```

### 3.2 Pour la table Région

```
CREATE TABLE Région (  
    Code_dep_code_commune VARCHAR NOT NULL,  
    reg_code INTEGER NOT NULL,  
    aca_nom VARCHAR NOT NULL,  
    dep_nom VARCHAR NOT NULL,  
    com_nom_maj_court VARCHAR NOT NULL,  
    dep_code INTEGER NOT NULL,  
    dep_nom_num VARCHAR NOT NULL,  
    reg_nom VARCHAR NOT NULL,  
    PRIMARY KEY (Code_dep_code_commune)  
);
```

## 4. Base de données chargée

### 4.2 Table Contrat

Nombre de lignes : 30335

| Table |  | Formulaire |  |  |  |  |  |  |  |  |  |  |  |  |  |
|-------|--|------------|--|--|--|--|--|--|--|--|--|--|--|--|--|
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
|       |  |            |  |  |  |  |  |  |  |  |  |  |  |  |  |
